Spokes has been awarded Climate Challenge Funding for a project to produce and disseminate information on how individuals and groups can achieve practical improvements in bike storage for tenements and flats – in-flat, in-stair, backgreen or on-street. TPi Consultants have been working for us, looking at the practical issues – including planning, management and legal issues - as well as the hardware options - to identify possible solutions for different situations. **We are planning to make available extensive information and guidance materials based on this work, by late autumn 2010 (free from our website)**, for use by individuals, stairs, developers, councils and others who are looking for the best way to live with a bike in their particular accommodation. We hope this will be a starting point in stimulating actual practical storage improvements to help and encourage people to use bikes for their everyday local journeys.

### Want to cycle more, and looking for information??

[www.spokes.org.uk/wordpress](http://www.spokes.org.uk/wordpress) – campaigning for better conditions for using a bike for your everyday work and leisure journeys – we also produce excellent cycle maps for Edinburgh, the Lothians and Glasgow, run Sunday rides, and have all sorts of useful website information. Also links to other local cycling groups, forums, etc.

[www.thebikestation.org.uk](http://www.thebikestation.org.uk) – quality re-conditional bikes at good prices, also promoting bike use with employers.

[www.edinburgh.gov.uk/cycling](http://www.edinburgh.gov.uk/cycling) - Edinburgh City Council information on cycling to work, local cycling maps, other useful weblinks / organisations
