

A problem I have encountered with cycling... I wanted to cycle to school but I couldn't unless both my parents were there to as I have a little brother. And it was uphill so quite difficult.

How I solved it...

As well as going on a tag-along I learned to ride my own bike. My brother learned to go on the tag-along. I am careful on the road and listen to instructions so now we can cycle with one parent. I'm going to have a lesson at the bike station soon.
