

Spokes grant to purchase Urban Arrow – August 2020

The whole family have been delighted with the purchase of the Urban Arrow family e-cargo bike, made possible with the help of the grant from Spokes!

We introduced our eldest daughter to the joys of cycling before she could walk, using a front loaded bike seat, and we were keen to be able to give our new baby a similar experience, and be able to continue cycling as a family. We felt the benefit of having the children in front were huge – being able to see and speak to them, and give them the experience of cycling were key for us when looking at transport options. We had looked at cargo bikes for a while but the grant from Spokes made this possible for us.

Our bike arrived in June, and after the long months of lockdown; being able to have us all jump on the bike has been amazing! **From trips to the beach, collecting the shopping, and now the nursery run, most days involve a trip on the bike!**

Both children love it – our three year old loves being able to see and wave to people, and our 8 month old takes many a nap in the car seat with maxi-cosi adaptor.

I highly recommend it to any family and can't thank Spokes enough for helping make this possible!

Josie
