Subject: West Edinburgh Link: Traffic Regulation and Redetermination Order advertisement update

To: Churm, Cameron <[cameron.churm@aecom.com](mailto:cameron.churm@aecom.com)>

Good Afternoon,

On behalf of the City of Edinburgh Council, we are pleased to give you an update on the West Edinburgh Link (WEL) project and advertisement of the Traffic Regulation Orders (TRO) and Redetermination Orders (RSO) required to enable the project. You are being contacted as you are a stakeholder to the project or have previously registered to be updated on progress.

The TRO's and RSO's do not include any areas or interventions associated with East Craigs and the potential Low Traffic Neighbourhood which is being considered separately.

The WEL project has reached its final design proposals and is proceeding with the advertisement of its TRO and RSO's required to enable the proposed changes to parking, loading and creation of new footway, carriageway and cycle track.

The TRO and RSO processes are an opportunity for the public to view, comment on and object to the proposals. During this time, comments or objections on the proposals can be made by emailing [trafficorders@edinburgh.gov.uk](mailto:trafficorders@edinburgh.gov.uk) and all the information and plans can be accessed via the project website: [www.westedinburghlink.info](http://www.westedinburghlink.info). The Orders are planned for advertisement from 29<sup>th</sup> January for a periods of 4 weeks.

Full details of the project, final designs and frequently asked questions are available on the project website: <https://westedinburghlink.info/consultation/>.

## **Project Timeline**

TRO/RSO Advertisement: 29<sup>th</sup> January – 26<sup>th</sup> February 2021

Detailed Design and Procurement: 2021

Phased Construction: 2022 – 2023

Kind regards,
