Subject: Proposed measures at St Georges School for Girls to aid safe travel to school

Dear Spaces for People

Apologies that this response has not made your submission deadline. I hope that it can nevertheless be accepted.

Spokes welcomes the modest proposal for St George's School to prevent parents using Crarae Avenue as a drop off/ pick up point. This will benefit pedestrians. It has no direct impact on cycling but in a small way it reduces the domination of car travel on our streets and thereby makes cycling more attractive

We think other easy to implement measures could be taken forward at St George's. At the junction of Henderland Road and Garscube Terrace additional yellow lining would deter inappropriate drop off/ pick ups there.
