Planning - permitted development rights review - phase 2: consultation

I am emailing from [Spokes the Lothian Cycle Campaign](#).

We unfortunately have not had the capacity to prepare a separate response to this consultation.

However, we fully endorse the entire submission by Living Streets Scotland, and would be grateful if you could register our response as being the same for all questions.

Question 15 is probably our top concern, particularly...

that new EV charging infrastructure does not diminish the opportunities to retrofit the streets with protected cycle lanes.

However, we endorse the entire submission, being an organisation which supports all forms of active and sustainable transport, and which wishes to see fulfilment of the Scottish Government's commitment to reduce car-km (including EV) by 20% by 2030.

I attach our respondent info form and the Living Streets response
