Spokes Cargobike Support Grant Report

Report

We used the Spokes Cargobike support grant to purchase a second hand Bullit by Larry vs Harry.

This bike was bought in order to increase our company's capacity as a local cargobike delivery service. The bike has been used almost everyday since it was purchased and it has played a crucial role in Farr Out Deliveries' expansion in the Scottish urban logistics sector.

So far, the bike has traveled 10,900KM while making deliveries in the Edinburgh area. It has been used to service a wide range of local businesses from book shops to breweries and bakeries. The bike has been extremely effective at making these deliveries and has stood up well to challenging working conditions and a lot of use, it is the model of bike which we own most of.

It has a shimano nexus hub gear, which has required minimal maintenance and this bike has had a fewer rate of mechanical errors than any other in the fleet.

Farr Out Deliveries is extremely grateful for the support offered by Spokes. Gathering enough resources to invest in new bikes for our fleet has been a big challenge for our company. The bike that was purchased using this grant has played a large role in supporting the local businesses we work for and helping them to make their operations more sustainable.

Thank You!
