ENTRY 25

**A problem I have encountered with cycling...**

Storing my new bike in a flat with cream carpets and walls;
Second floor no needs to be carried up stairs;
Small room so minimum space

**How I solved it...**

Bought a bike cover from Edinburgh Bike Coop
Turn the bike upside down
Put the cover on so the tyres are covered
Turn the bike the right way up
Turn the handlebars parallel to the frame
carry the bike + cover up the stairs - the walls won't get marked
Put it in a small bikestand in which the front wheel sits.
It is out of the way and doesn't mark the walls or carpet.
