

Spokes granted Dalry Bicycle Depot £2000 in 2024 towards the cost of an Omnium E-Cargo V3 cargobike via Soul Cycles. Our grant includes a 50% contribution from the Galashan Trust.

Report, September 2024

We opened our shop in June 2023 and wanted to be able to offer local deliveries and pick up servicing which was not viable by car as it opposed our goals and values of the bike shop. We were struggling to schedule collections for our scrap metal and wanted to be able to do this ourselves when needed.

With the grant from Spokes we were able to purchase an Electric Omnium through Soul Cycles. We now offer a local pick up and delivery service and regularly take all our scrap metal, old tyres and tubes to recycling centres in Edinburgh all without the use of a car or van.

We have also used the Omnium during a number of cycling events to help carry equipment that would have not been possible without it.

The two photos show the cargobike loaded up with two old bikes and with tyres & materials for recycling.
